CONCLUSION
Children are the future! 48

Note: Additional statistical, financial, and student performance data are available in supplements to this Annual Report.

Education must be everyone's priority!

Together, we who work in and for Utah's schools and who set the policies and make the laws that affect them are engaged in an unprecedented task: that of retooling our public education system in a more cohesive, interconnected way for the youth of the 21st century. The education community cannot do it alone.

It is vital that this student-focused system serve those who are disadvantaged and be an interactive one that involves business and civic leaders, citizens of all ages and walks of life, and most of all parents and families in the shared endeavor to develop the potential of each of our young people to the fullest.

Utah continues to cope with a unique combination of constraints: a per-pupil expenditure that remains the lowest in the nation, and a disproportionately large 5-17 year-old school-age population compared to the size of its adult work force of contributing taxpayers.

Further complicating our demographics is a surprising 1991 population increase (2.7%). This growth is the largest Utah has experienced in the past ten years, with over half coming from in-migrating families. Our schools were not geared up to accommodate this unexpected new wave of rising enrollment.

Last December, U.S. Secretary of Education Lamar Alexander recognized Utah's progressive efforts to reach the national education goals and pursue its own statewide strategic plan. This 1990-91 Annual Report describes many such accomplishments of our state education agency and cites examples of curriculum integration and interagency collaboration.

All of us rely on the cultural and economic benefits education generates to help uphold the standard of living we enjoy. If we all take a positive attitude as advocates for educational excellence, we cannot fail. When education is everyone's priority, Utah's schools will be as great as we want them to be.

Jay B. Taggart
State Superintendent

We're doing public education strategic planning...

The Public Education Strategic Plan

In December 1991 the Utah State Board of Education endorsed the nine principles of Utah's Public Education Strategic Plan that identifies collaborative roles of the State Legislature, higher education, local school districts and schools, and the Utah Partnership for Educational and Economic Development as well as the State Board itself in support of:

1. accountable, competency-based education system;
2. school choice to stimulate competitiveness and improvement;
3. greater school autonomy for how results are reached;
4. enhanced teacher compensation and professionalism;
5. client involvement in academic/occupational plans;
6. greater efficiency/effectiveness through use of technology;
7. improvement through educational research and development;
8. business and industry involvement in education; and
9. public relations to inform education stakeholders.

The National Education Goals

These nine principles of Utah's Public Education Strategic Plan are fully compatible with the six National Education Goals announced last spring by U.S. Secretary Lamar Alexander that by the year 2000:

1. all children in America will start school ready to learn;
2. the high school graduation rate will increase to at least 90 percent;
3. American students will leave grades four, eight, and twelve having demonstrated competency in challenging subject matter including English, mathematics, science, history, and geography; and every school in America will ensure that all students learn to use their minds well, so they may be prepared for responsible citizenship, further learning, and productive employment in our modern economy;

4. U.S. students will be first in the world in science and mathematics achievement ;
5. every adult American will be literate and will possess the knowledge and skills necessary to compete in a global economy and exercise the rights and responsibilities of citizenship; and
6. every school in America will be free of drugs and violence and will offer a disciplined environment conducive to learning.

A Shift In Focus

Utah is ahead of most states in its attempts to restructure education for the future. Already schools in 27 of our 40 districts are implementing America 2000 education strategies in pursuit of the national goals. Our efforts are further strengthened by the enduring vision of A Shift in Focus which has continued to give direction to the Board's work since 1989 "to empower each student to function effectively in society as a competent, productive, caring and responsible citizen..."

Local Education Planning

Spurred by House Bill 170 requiring all school districts to submit an annual performance report to the Legislature and their patrons, and these state and national initiatives, and their growing sense of autonomy, more and more districts and local school boards are setting long-term strategic district plans in motion that help set the focus and pace of their progress as they pursue their own destinies within their communities.

During 1990-91 the State Office of Education Project Assistance Services Section assisted the Legislature in its statewide Education Strategic Planning initiative and facilitated the work of its action teams in the development of plans in support of each strategy. The section also responded to requests from districts from throughout the state by serving as consultants, facilitators, and participants in their strategic planning process.

We're basing achievement on student outcomes...

Utah's Statewide Testing Program

1991 is the second year of Utah's Statewide Testing Program. The 1990 Utah Legislature gave the State Board and State Office of Education responsibility for administering the same norm-referenced achievement test statewide to students in grades 5, 8, and 11 and reporting the resulting school and district averages to the public.

Last fall most schools administered the tests for the second time. The State Office purchased tests, answer sheets, and other materials and assumed all scoring and reporting costs. In December, as before, results featuring both average school and district scores as well as predicted ranges were sent to the local districts for their use.

Overall 1991 outcomes show notable gains. In mathematics, Utah students at all three grade levels scored higher than their counterparts a year earlier as did fifth graders in reading and in science. The

*The National Norm is 50 for each subtest.

typical Utah fifth grader scored better than 62% of the national norm group in math, impressive evidence of improved program and instructional quality.

Scores in the language/English area are clearly Utah's lowest. While grade 11 performance rose slightly in 1991, scores at both grades 5 and 8 showed no improvement, the only cases in which Utah students under-performed the national norm group. Total basic battery median scores showed overall improvement in grades 5 and 11 with stability at grade 8.

Core Curriculum Assessment

Utah's work in wide-range criterion-referenced testing is probably the most comprehensive undertaking of its kind in the nation. Thirty-six elementary end-of-level tests are now available in math, reading, and science, and 38 secondary tests have been developed for 19 different math and science courses.

In addition, 28 volumes of test item pools have been developed for virtually every area of the core, each containing from 800 to 3,000 individual test items. Nearly 400,000 state core tests were given to Utah students by districts in spring 1991, almost twice as many as in 1989, and 34 districts used both state core tests and state scoring services.

Led by the State Office of Education, the development of Utah's Core Curriculum Assessment Program is an excellent example of collaboration with the state's universities and colleges, almost all of Utah's 40 school districts, and both in- and out-of-state educational research organizations.

Utah's ACT Test Performance

1991 results for Utah students taking the ACT were substantially higher than those of the national comparison group in English, reading, science, reasoning, and the composite score, and lower in mathematics. Between 1990 and 1991, ACT scores in both Utah and the nation fell in English, but an analysis of subscores from the enhanced 1991 ACT test shows Utah students doing notably better than their national counterparts in rhetorical skills and reading arts/literature.

The 15,991 ACT test takers in Utah's class of 1991 (68% of the state's total graduating class) continue to include many who would not elect to participate in other states. A very important additional finding this year is that students taking a rigorous additional high school program (at least four years of English and three of math, social studies, and science in grades 9-12) scored higher than students who did not.

The AP (Advanced Placement) Program

In 1990-91 Utah's AP Program continued to enable academically talented high school students to earn significant amounts of college credit, and AP participation continued to be extraordinarily high. A total of 11,586 AP examinations were taken by 7,596 Utah students, an increase of over 300% since 1982, and 70.2% of all exams taken earned a qualifying score.

Only Washington D.C. exceeds Utah in the number of AP exams taken per 1,000 eleventh and twelfth graders, and the number in Utah is more than double that of the national average. Results based on the performance of these juniors and seniors show Utah students earning a higher passing percentage in AP exams in fine arts and core subjects than those in the nation's capital.

ADVANCED PLACEMENT PARTICIPATION AND PERFORMANCE

Cost per 1/4 Hour	$8.55	$11.87	$10.15	$8.55

Concurrent Enrollment

Since its initiation by the Legislature in 1987, Utah's Concurrent Enrollment Program has grown steadily, with school districts and colleges/universities working toward better, more interactive ways of serving students in all regions of the state. Concurrent enrollment meets the needs of many students who seek a more rigorous academic program to challenge them during their junior and senior high school years. Although overall funding has increased, the cost per quarter hour declined significantly in 1990-91. Such programs continue to stretch Utah's education dollars and to support the growing trend to measure student progress in terms of learning outcomes instead of seat time.

The Experimental-Developmental Program

Acting on a State Office of Education Finance Committee recommendation, the 1991 Legislature consolidated funds from Utah's existing reform programs. The pooling of these funds produced $4,015,100. In accord with the law, half of this was sent to districts based on an allocation formula, and the rest is being used to fund statewide experimental /developmental initiatives and competitive grant applications. For 1991-92, 47 projects representing 19 districts and regional service centers received these grants.

FY 1990-91 Reform Programs

While they were still in effect during 1990-91, the former reform programs continued to contribute to our efficiency. The PEEPS (Promoting Excellence and Efficiency in Public Schools) initiative focused on evaluation and cooperative planning. Selected from 68 applications submitted from 21 districts and agencies, 24 PEEPS projects were funded in such areas as curriculum revision and scheduling options.

1990-91 Productivity Projects were funded in planning, collaboration, implementation, and restructuring with priorities on site-based decision making, student responsibility, performance assessment and measurable outcomes, enhancement of science and math, and cooperative learning. An implementation project in Davis District focused on interactive videodisc technology in science, and a collaborative effort among Alpine, Provo, North Sanpete, and Cache districts dealt with foreign languages.

During 1990-91 an unprecedented record of 2,327 Utah teachers in 71 elementary and middle year-round schools served over 59,000 students. An additional 32 elementary schools operated extended-day schedules that affected 760 teachers and 21,000 students. Utah continues to have a higher percentage of school district involvement in modified scheduling than does any other state.

Outcome-Based Education

Although the 1991 Legislature consolidated funding for Outcome-Based Education (OBE) along with that of other reform programs into the new Experimental/Developmental appropriation, the principles and processes of OBE continue to exert a positive impact on student learning, teacher satisfaction, and the support of administrators, board members, and parents to a varying extent in all Utah school districts. OBE is Utah's oldest reform program.

The Outcomes Driven Developmental Model (ODDM), the implementation model of OBE, recently added six schools from a district just entering the program to its consortium, and several schools in other districts. With a total of more than 170 schools from 22 districts participating on an active and regular basis, the ODDM Consortium may well be Utah's most extensive experiment in educational collaboration.

Taking a holistic and systemic approach to school improvement, Utah's ODDM districts are reaping the strong benefits of collaboration. Superintendents of the ODDM districts formed a Superintendents Council that meets regularly to monitor the progress of teams that carry out special projects in cooperation with Utah's regional service centers and the State Office of Education. One center and 13 of the 22 districts have already developed strategic plans.

Progress in Rural Education

Recognizing the potential strength in unity, 26 rural districts have formed four cooperatives with a regional education service center in each to provide support similar to that offered by a large district's central office. A cooperative multi-regional organization, the Regional Education Service Centers United (RESCU), brings RESC directors together regularly to work on cooperative enterprises and share their resources.

Rural educators are hard at work uniting all organizations concerned with rural schools. For example, the planning committee for the 1992 Rural Schools Conference has membership from the Utah Rural Schools Association (URSA), each regional education service center, the ODDM Consortium, and the State Office of Education. The Utah Institute for School Improvement (ISI), which provides indepth training in critical skills needed in the application of OBE and ODDM, is being planned similarly.

The State Office of Education has membership with and provides the executive secretary for RESCU and for URSA, and provides staff support for the ODDM Consortium. The URSA Board of Directors includes a college/university representative as well as representatives from the Utah School Boards Association and the Utah School Superintendents Association. Also included are the chairman of RESCU and the State Office of Education's Rural Schools and RESC specialist.

Site-Based Decision Making

The 1991 Legislature appropriated $800,000 for three-year site-based decision making pilot programs developed by local school community groups of teachers, classified employees, school administrators, and parents to make school-level decisions on matters critical to attainment of the school's specific goals. This new program provided a $50,000 allocation to each of 16 pilot schools across the full urban-rural and K-12 spectrum.

The following 16 schools, selected from among 39 applications from 17 districts by representatives of the UEA, PTA, Utah School Boards Association, elementary and secondary school principals associations, Utah School Superintendents Association, and State Office of Education, are currently implementing their proposals:

Bear River Elementary and McKinley Elementary, Box Elder District; Davis Elementary, Uintah District; Orem Elementary and Orem High, Alpine District; Hill Field Elementary, Davis District; Liberty Elementary, Murray District; Lincoln Elementary and Mountain Crest High, Cache District; Lynn Elementary and Taylor Elementary, Ogden District; Valley Elementary, Kane District; Westridge Elementary and Provo High, Provo District; Woodruff Elementary, Logan District; and Manti High, South Sanpete District.

Other schools are also working to restructure the way they deliver education and to reshape their vision. Part of Sevier District's America 2000 plan, North Sevier High School, for example, is even terminating, interviewing, and rehiring its own staff in alignment with its new focus on cooperative grouping, peer mentoring, self-directed learning, community apprenticeships, and the integration of its curriculum emphasizing meaningful contextual ideas.

RURAL COLLABORATION

Chapter 2 Education Improvement

Chapter 2 of the Education Consolidation and Improvement Act (ECIA) is providing funding through the State Office of Education to help schools serve students at risk, acquire and use instructional materials, implement effective programs, train personnel, enhance learning excellence, and design innovative projects. Only two districts are reporting expenditures in all six of these areas. Twelve have targeted just one for attention. Enrollment in participating districts ranges from 200 to 78,000.

CHAPTER 2 FUND DISTRIBUTION
1991–92

Program Purpose Category	Amount Budgeted Statewide
At-Risk Students	$1,059,521
Acquire and Use Instructional Materials	1,436,106
Effective Schools	158,507
Professional Development	420,628
Enhance Personal Excellence	248,156
Innovative Projects/School Climate	130,693
TOTAL	$3,453,611

We're helping children start school ready to learn...

Early Intervention for Student Success

In a landmark partnership with health and human service agencies, the Utah State Office of Education Services for At Risk Students Section is administering an allocation of $1,028,000 from the State Council for At Risk Children and Youth. Its purpose is to encourage collaborative intervention services to reduce problems resulting in school dropout, academic failure, social misbehavior, and risky health-related practices.

Emphasizing developmental rather than remedial approaches, the program motivates agencies to take joint responsibility for the outcome of their efforts to address the critical needs of children in grades K-3 and their families. Based on the findings of seven pilot projects, three-year grants extending through July 1994 were awarded to Jordan, Grand, Davis, Tooele, Salt Lake City, Iron, Provo, and Ogden/Weber districts involving a total of 37 schools.

Each participating district must form a coordinating council consisting of the superintendent, principals, teachers, health officers and school nurses, substance abuse and mental health authorities, parents of at risk students, and representatives of law enforcement and the PTA. Each participating school must form a case management team ofsimilar individuals to implement an individual plan for each child and family.

The services provided may include parenting classes, before and after school programs, home visits, family literacy programs, bilingual services, cross training of staff, mentoring and peer tutoring, students as family advocates, healthy lifestyles classes, nutrition education, child growth and development classes, first aid and safety instruction, and health screening that work together to lay the groundwork for success.

Utah Center for Families in Education

Last spring, the Utah State Office of Education and the Utah State PTA joined together to create the Utah Center for Families in Education. Housed at the State Office, the Center opened its doors to the public in April 1991, to increase family involvement and responsibility for the education of their children. Besides acting as a clearinghouse for parenting information, the Center promotes collaboration among parents, educators, and the community.

The Center also is supporting a five-year pilot study using a national model in parent/family involvement with Alpine, Beaver, and Salt Lake City school districts and providing resource materials and training for other districts in their efforts to strengthen the role of parents in their children's school success. The mission of the Center is based on the recognition that families exert a primary, vital influence on their children's lives.

In October 1991 the State Office of Education and State PTA cosponsored the first annual Conference on Family Involvement in Education with the theme "Turn On the Light of Learning in Your Home." Held at the State Fairpark in Salt Lake City, the event featured national speakers and 16 workshops on a wide variety of topics relating to building better parent/child/school relationships. A second conference is being planned for April 1992.

A major project of the Center has been to launch the Family EDinfo Hotline, a series of 57 three-minute messages accessible from any touch-tone telephone 24-hours-a-day by calling 531-7007 in the Salt Lake area or 1-800-332-7007 outside that area. The messages provide information to parents on such topics as becoming a school volunteer, controlling television time, programs for special needs, parents' legal rights, financial aid for college, teenage alcoholism, and what parents can do about gangs.

We're integrating academic and vocational preparation...

Utah's Nine-District Consortium

Now being field-tested, Utah's Nine-District Consortium evolved from an innovative approach to prepare high school students with appropriate job skills for a successful future in our rapidly changing technological society. The Consortium was first presented by the State Board of Education at the 1989 June Vocational Conference. With courage and foresight, the Board recognized that nothing less than a new market-driven delivery system for secondary vocational education was needed.

Last year, the Board invited nine districts spread across the geographical regions of the state to select one high school each as a pilot site to submit proposals detailing resources, time lines, strategies, and a replication plan for their projects. A financial support plan was also devised using $500,000 in federal Carl Perkins funds for development as well as state experimental and vocational dollars and a partial local match. Consortium member schools are now moving forward to implement their proposals.

Student Educational/ Occupational Plans

The driving force of this new system is the Student Educational/Occupational Plan (SEOP) which guarantees that every high school student will graduate with a marketable skill or a specific plan for further academic study or vocational training. A required part of the vocational core curriculum, the SEOP provides 1/2 unit of credit toward graduation and enables all vocational students including handicapped and disadvantaged youth to acquire a marketable skill with which to earn a living or finance further training.

The SEOP is based on a sequence of courses custom-designed to facilitate the student's individual progress toward his or her goal and is outcome based with a complete list of competencies for each approved area. Course sequence guides for 149 different occupations have been developed to assist counselors, provide a step-by-step road map toward the ultimate objective of employment, and include both academic and vocational requirements.

The Plan also incorporates a work-related co-op and/or apprenticeship work experience for vocational students. A job placement and follow-up program places students in jobs that directly relate to their occupational plan and preparation program and tracks their employment for a minimum of one year after program completion or high school graduation.

Comprehensive Guidance Program

Facilitating the success of SEOPs is Utah's Comprehensive Guidance Program. Along with assisting students on a continuing basis as they develop , refine, and follow their individual plans through the secondary grades, it teaches an in-depth guidance curriculum which provides knowledge of growth and development, promotes positive mental health, and helps students acquire and use life skills.

Beginning in 1989 in 11 schools, model comprehensive guidance programs are now being piloted in 40 schools through the intensive inservice training of counselors and administrators. Approaching guidance as a program rather than just an ancillary service will enable pilot school counselors to spend virtually all their time teaching and developing SEOPs.

Placement Services

In January 1991 Utah's southwest region hired the first of five placement counselors to place graduating high school seniors in jobs using existing Job Service counselors. This was a collaborative effort between Washington, Kane, Iron, Garfield, and Beaver school districts, JTPA, Job Service, Association of Governments, and the State Office of Education. This model is being copied in several other districts at the present time.

Carl Perkins Reauthorization

Carl D. Perkins federal legislation was reauthorized in September 1990, covering fiscal years 1992 through 1994 to "make the United States more competitive in the world economy by developing more fully the academic and occupational skills of all segments of the population." The focus is on serving special populations and integrating vocational and academic education.

Davis District's new Northridge High School, for example, a member of Utah's Nine District Consortium, plans to integrate arts and communication; industrial technology and engineering; agriculture and natural resources; business and marketing; health and home economics; and social, human, and government resources as career paths for grades 10-12.

We're expanding vocational education options...

Business Education

Standards and objectives have been developed for all state-approved Business Education courses. The video *How To Succeed in the Business World: What Today's Employers Really Want,* with accompanying teacher/student handbook, was distributed to high schools, and a new state-approved, technology-oriented course for ninth grade students, *Business and Computer Dynamics*, is being piloted this year.

During 1990-91 over 9,300 business education students were given performance-based tests in the areas of accounting, data processing, and word processing. Certificates identifying competencies passed are provided to prospective employers.

Health Occupations

The integration of Health Education and Health Occupations has been completed. This coordination enables better use of student time. New programs that help provide Sports Medicine instruction at high schools and which also provide vocational training in Physical Therapy and Emergency Medical Training have begun in several school districts.

Agriculture Education

The agriculture component of the Technology/Life/Careers junior high curriculum was completely revised in 1990-91. The focus of the revision was to integrate biological science with the agriculture area. Biotechnology was implemented into several of the units along with computer technology, marketing, and management techniques.

The Agriculture and the Trade, Industrial, and Technical Education areas of secondary vocational education have worked with the Utah School Boards Association and the State Division of Risk Management in developing a Utah Safety Guide.

A summer internship program was established to allow graduating college seniors who are majoring in agriculture education to work throughout the state with the Summer Agriculture Program. This will offer potential teachers much needed internship experience in running a successful summer "ag" program.

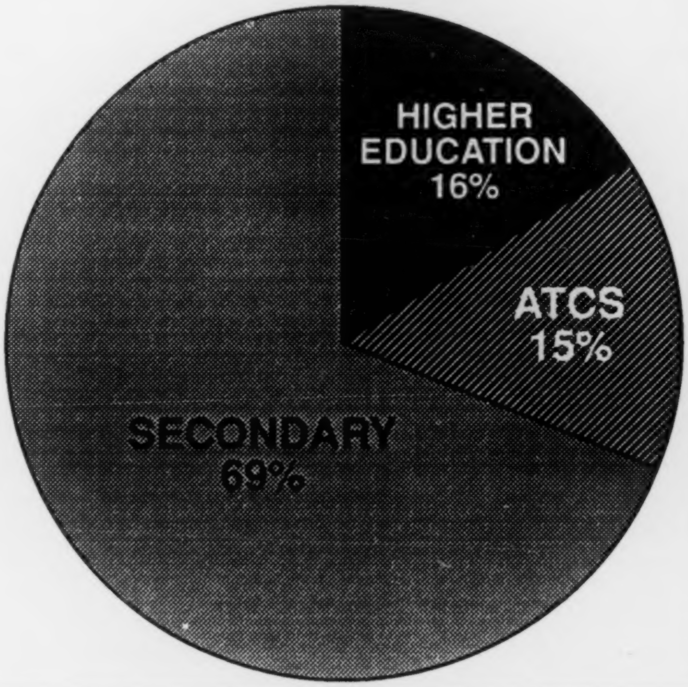
Industrial and Agriculture Technology

Currently under development, the Industrial and Agricultural Technology (IAT) curriculum is specifically designed to be used in rural junior highs and high schools where it is unlikely that both technology education and agriculture teachers are on staff. The goal of the course is to expand career options and preparation for all students who are interested in these fields. Curriculum areas include manufacturing/engineering, energy/transportation, and agricultural science. A career guidance component is built into each unit.

Trade, Industrial, and Technical Education

Some 41 innovative High Tech Projects have been recently funded through federal and state categorical programs for implementation through high schools, ATCs, and post-secondary institutions, and focus on the following areas:

- Weber State University, Salt Lake Community College, Dixie College, and Dixie High School are now nationally certified to teach the Automotive Service Excellence (ASE) Program. This requires a complete upgrade of the program to teach service techniques on new and developing high-tech vehicles of the 1990s.
- Three new occupational computer programming/computer science programs have been developed in the state and are located at Mountain Crest and Sky View high schools in Cache District and at Pineview High in Washington District. They include all-new labs for Computers; Robotics; Computer Numerical Control (CNC) at Davis ATC, Orem High, Juab High, Gunnison Valley High, North Summit High, South Summit High, Park City High, and Wasatch High; Computer Aided Drafting (CAD); Computer Graphics; and Computer Programmable Controllers.
- Complete new competency-based and individualized Principles of Technology (PT) programs, along with new computerized laboratories, have been developed. These programs are located at Ogden High School. In addition to a new CAD lab at WSU's School of Technology, major laboratory updates were made at Davis, Sevier Valley, Ogden-Weber ATCs, and South Rich, South Summit, South Sanpete , Uintah, Tooel, and Grantsville high schools.



VOCATIONAL EDUCATION ENROLLMENT FY 1990

Economic Education

During 1990-91 over 50 junior and senior high schools had teams involving a total of about 1,500 students who played The Stock Market Game. Sponsored by the Securities Industry Association, the Utah State Office of Education, and the Utah Council on Economic Education, the game supports the social studies, economics, business, and marketing curriculum. As they play, students also learn about corporations, economic conditions and factors, ethics, and the impact of world events on America's financial well-being.

$15,000 was awarded again this past year to the top three winning high school student finalists in the 1991 Governor's Young Entrepreneur Search. All finalists were honored at the 6th Annual Governor's Conference on Economic Development and Education jointly sponsored by the Utah State Board for Vocational Education and the Utah Division of Business and Economic Development.

Marketing Education

Utah businesses, corporations, and other companies are giving financial or in-kind donations to support marketing education in the secondary schools. For example, Matrixx Marketing is providing $5,000 to help sponsor the upcoming State Distributive Education Clubs of America program and funded the Young Entrepreneur program. Several businesses are inviting marketing teachers to tour their facilities on a regular basis and receive instruction on how they market their products. J.C. Penney is donating $1,500 to recognize the secondary and post-secondary 1991-92 Marketing Education Teacher-of-the-Year.

Vocational Leadership Organizations

During 1990-91 Utah's vocational leadership organizations continued to function as an integral part of the related curriculum for students enrolled in vocational programs from junior high/middle school through the university level. Last year, 14,562 members were active in the following twelve organizations:

Vocational Industrial Clubs of America (VICA), Health Occupations Students of America (HOSA), Future Homemakers of America/Home Economics Related Occupations (FHA/HERO), Future Business Leaders of America (FBLA), Distributive Education Clubs of America (DECA), Technology Students' Association (TSA), Future Farmers of America (FFA), Delta Epsilon Chi, Phi Beta Lambda, Utah Homemakers, and Young Farmers.

Vocational Gender Equity

During 1990-91 Vocational Opportunity Through Equity (VOTE) curriculum materials continued to be used in hundreds of Utah classrooms. The two videos *Breaking Out* and *Expectations and Realities*, which explore changing attitudes and men and women in non-traditional occupations, were shown in high schools, and gender equity concepts have been incorporated into the junior high Technology/Life/Careers vocational core.

Three gender equity technical assistance centers (GETAC) continued to provide workshop inservice training to teachers and administrators throughout the state. The GETAC coordinators served as a screening body for national and local resource materials and provided videos, books, handouts and personnel willing to make classroom presentations. A total of 700 educators and civic leaders, 1,204 secondary students, and 349 post-secondary students received GETAC services in 1990-91.

We're building business and industry partnerships...

Applied Technology Centers

In 1990-91 use of Utah's five Applied Technology Centers (ATCs) by high school students increased by an average of 18.5%. Adult ATC enrollment increased by 10.3% for the same period of time. Currently only 25% of all ATC services are specifically geared to secondary students, a distinction likely to become less significant during the next few years.

$175,000 in vocational funds to provide ATC-formatted services have been distributed to facilities in the four regions in Utah for whom existing ATCs are not easily accessible.

The role of Utah's ATCs will continue to broaden as more high school students pursue their SEOPs, more adults seek retraining for new careers, and the ATCs respond to our rapidly changing job market.

High School Apprenticeships

1991 was the first year of training for high school students through the Apprenticeship Program. The Legislature approved the program to correspond to federal laws which allow 16-year-olds to begin their apprenticeship training while still in high school. Curriculum was developed in cooperation with the Utah Apprenticeship Council to provide pre-apprenticeship and related classroom training which is presently being incorporated throughout the state.

Approximately 30 high school students are presently enrolled and 150-200 are anticipated by the end of the current school year. The 834 approved apprenticeship programs range from one to four years in length and many are competency-based. Full-time employment is incorporated with related class experiences during the summer months. The Utah State Office of Education hopes to provide apprenticeship training for 10% of all high school graduates.

Custom-Fit Training

Administered by the State Office of Education, the Custom-Fit Training Program assisted over 270 new and expanding companies in FY 1991 by training approximately 3,100 of their new employees. This training was done using $2,500,000 in state funding appropriated by the Utah Legislature. The program assists business enterprises in all economic sectors with the costs of classroom training, on-the-job training, occupational curriculum development, and testing/evaluation.

Many companies which have recently chosen to establish themselves in or expand in Utah cite the incentives of Custom-Fit Training as a primary factor in their decision. Representatives claim Custom-Fit gives Utah a very competitive edge because the training support is so important a consideration along with the facilitation of start-up and relocation costs.

Designed with business and industry input, a new curriculum called *Critical Workplace Skills* provides secondary students who will be placed in Custom-Fit positions with certified academic and occupational basic skills in critical thinking, quality control, applied math, technologies of work, work success, workplace economics, computer literacy, and safety. Involvement of business and industry in this course contributes to improved partnerships.

Utah Public Education Foundation

In fulfillment of its mission to motivate individuals and businesses to contribute resources to the Utah public school system, the Utah Public Education Foundation has established partnerships with companies such as Geneva Steel, TCI CableVision, Smith's Food and Drug Stores, Albertson's, Chevron Oil Company, KSL, and the Salt Lake Area Chamber of Commerce. Seminars have been held to help businesses understand the school/business partnership process. The Incentives for Excellence program also encourages schools and businesses to collaborate to qualify for legislative funds.

During 1990-91, the Board of Directors of the Utah Public Education Foundation, composed of influential business and community leaders, successfully sponsored 29 mini grants to teachers across the state. The grants were designed to fund creative ideas developed by teachers to enhance the education of their students. A traveling art show which demonstrated talents of high school art teachers and sought to raise funds for public education was conducted in Ogden, Salt Lake City, and St. George.

We're improving in math & science achievement...

Mathematics Education Update

In an effort to improve mathematics instruction at the elementary level, the State Office of Education mathematics specialist has established a level 2 elementary math endorsement. Courses leading to this endorsement are being offered on the Wasatch Front and are soon to be available throughout rural Utah.

Many changes are taking place in math teaching throughout the state. Among the most notable of these is the use of the graphics calculator in the study of trigonometry and advanced algebra. Students who learn to use the graphics calculator are showing evidence of increased achievement along with a significantly better understanding of mathematical concepts.

The use of computers has enhanced the teaching of geometry. Many students are spending one class hour every week or so actually doing geometry assignments on the computer. Not only have they shown improvement in test scores, but enrollment typically has increased as more students learn to value geometry in a new way.

Utah is continuing to obtain funding from the National Science Foundation for the Statewide Systemic Proposal in Mathematics and Science. The purpose of this program is to restructure the teaching and learning of mathematics in Utah's elementary and secondary schools. This involves both the inservice and preservice levels of teacher education.

Science Education Update

During 1990-91 ten teams of district-nominated science teachers received two weeks of training in the elementary science core curriculum. Each team, composed of an elementary and a secondary science teacher, studied content, methodology, and resource materials appropriate to each grade level of the state science core. Each team emerged from the experience with four boxes of resource materials, additional subject matter training, and an awareness of successful strategies for teaching elementary science.

As a result, 44 workshops have been scheduled so far this year. This massive effort should increase considerably the number of elementary teachers having student understanding of science and the processes of inquiry. Plans are underway to expand training to more districts next summer. Student textbooks, teacher lesson plans, and student readings have been revised for the two secondary science courses, physical earth science and biological earth science, and are being marketed by Davis School District.

For the second year, Wayne Sumner and Brent Watson, engineers with IOMEGA Corporation and paraprofessional astronomers, have conducted astronomy workshops at rural schools. IOMEGA also funded a Friday evening and all-day-Saturday workshop in which 38 4th-6th grade teachers each constructed a six-inch Newtonian reflecting telescope valued at $300 and were trained in its use. Resource materials were provided, a telephone hotline was set up for teachers to call if they needed help during the year, and on-site visits are being made.

The 1992 National Assessment

House Bill 321 enacted by the 1990 Utah Legislature mandated that Utah schools take part in the 1992 Trial State Assessment of Educational Progress. Focusing on reading and math at grade four and on math only at grade eight, this assessment will test random samples of 30 students each from 112 elementary and 86 middle and junior high schools next February. The U.S. Department of Education will release a detailed report on the Utah and national results in June 1992.

High School Course-Taking Patterns

Utah students appear to be taking a more rigorous program of studies in 1991 than in 1984. The enrollment of Utah high school students in courses in the typical math sequence has risen substantially, and the trend is particularly strong for algebra II and geometry. However, at least slight increases were noted for every course between 1984 and 1991 in mathematics.

For the science courses which are profiled, chemistry showed an increase of over 11% in enrollment between '84 and '91. The increase in physics was 6%. As of 1991, biology is the state's most popular science course. However, no trend data are available for comparison purposes in this area.

Slightly over 77% of the male graduates in the class of 1991 took three years of mathematics, while just over 73% of female graduates had this level of mathematics preparation. In the area of science, 53% of male graduates had at least three years of courses compared to 46% of the female graduates. In analyzing specific courses, approximately equal percentages of male and female students took algebra I and II but higher percentages of male students also took advanced algebra and trigonometry. In science, 39% of the male graduates took a chemistry class com-

Comparisons of Percentages of Utah High School Seniors Who Have Taken Specific Courses for 1984 and 1991

Course	1984	1991
Algebra	78.7%	82.9%
Algebra II	48.2%	64.8%
Advanced Algebra	NA	36.4%
Geometry	48.3%	65.4%
Trigonometry	24.7%	34.7%
Biology	NA	82.1%
Chemistry	26.7%	37.8%
Physics	14.2%	20.2%

AP Music/Art	NA	13.1%
AP Computer Science	NA	3.7%

pared to 36% of females, and 26% of males had a physics class compared to 15% of females.

Educational Equity Programs

Utah's MESA (Math, Engineering, Science Achievement) Program began in 1985 with 60 students as a public and private sector education partnership in one junior and one senior high school in Granite District. Today MESA is making a major impact on math and science achievement, attendance, graduation, and post-high-school education enrollment rates of underrepresented black, Hispanic, Indian, Polynesian, and female students.

Of the 851 teens who were MESA students in 1990-91, 560 (69%) were female and 255 (31%) were male. MESA has expanded in 1991-92 to 24 schools in five districts involving more than 1,000 targeted students. MESA's success is resulting in greater collaboration with projects such as the Math Science Network. Its "Expanding Your Horizons" regional conferences for girls throughout the state have raised their participation in math and science courses and parent/teacher awareness of their potential.

PROGRAMS OF STUDIES
of Utah High School Seniors in the Class of 1991
Grades 9–12

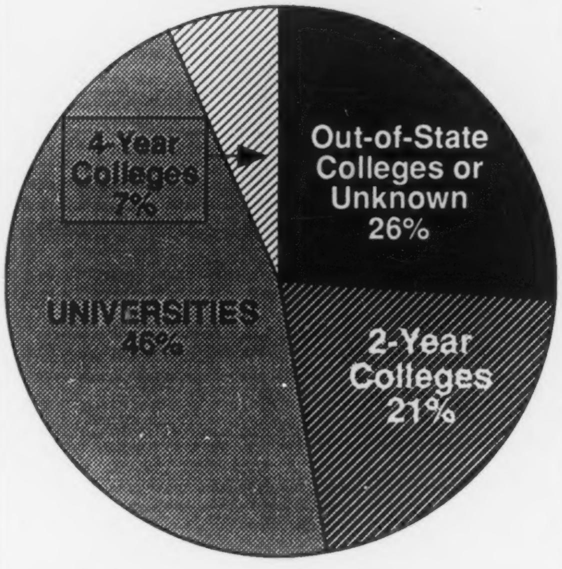
HIGHER EDUCATION PLANS OF **MESA GRADUATES 1990-91**



We're creating incentives for the teaching profession...

Alternative Preparation for Teaching

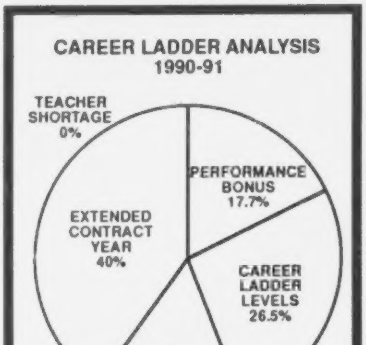
In April 1991 the Certification Section of the State Office of Education began implementing the new State Board of Education-approved policy on alternative certification of teachers. Following the announcement, the State Office received more than 150 inquiries from individuals interested in an alternative route to classroom teaching. The program allows individuals with appropriate academic backgrounds who receive a guarantee of employment from a Utah school district to begin a teaching career without completing a traditional teacher education program.

The candidates are evaluated by a committee including a university representative to determine if any course work such as classroom management is needed. As of December 1991, eight individuals have been hired as teachers in four Utah districts. Most come from business or industry backgrounds and are teaching in areas such as math, science, music, and history. Both urban and rural districts are represented.

Career Ladder Program

Now in its ninth year of operation, Utah's Career Ladder Program continues to benefit the teaching profession in Utah and the quality of the teaching-learning process. It offers financial and career incentives to keep good teachers in the classroom and to make better use of teacher talents. As teachers hone their skills and move up the ladder, program costs continue to rise but instructional excellence is enhanced and career ladder bonuses make a significant difference in teacher salaries.

In 1990-91, 11 districts were



Summary of Average Contract Salary and Career Ladder Monies

Average Teacher Salary	$25,578
Average Career Ladder Pay	1,845
Total Average Pay	**$27,423**
Total Average Benefits (including Career Ladders)	9,166
Total Average Compensation and Benefits	**$36,589**

involved in multi-year career ladder plans that lent continuity to long-range district goals. The program continues to refine itself as districts, applied technology centers, and the Utah Schools for the Deaf and the Blind evaluate Career Ladder components and their effectiveness. Statewide Career Ladder goals are to provide clear, unambiguous and consistently applied regulations, to stabilize multi-year plan approval and funding for the future, and to implement a statewide best practices interdistrict borrowing system.

Funding components in 1990-91 continued to be the performance bonus, career ladder levels, job enlargement, and extended contract days. The extended contract year, the most heavily utilized component, pays for non-teaching days beyond the regular school year and many districts are moving toward the 50% limit. Teacher shortage remains viable though no district used it last year.

Total Number of LETTERS OF AUTHORIZATION from 1970–90 and the Percentage of the Total Personnel

Year	Total No. Authorizations Issued	Percent of Total on Authorizations
1985	171	0.9
1986	312	1.6
1987	313	1.6
1988	911	4.5
1989	865	4.2
1990	885	4.3

Teacher Personnel Status

In 1990-91 Utah reported a total of 20,523 professional personnel: 9,918 elementary classroom teachers, 405 elementary principals, and 126 other elementary personnel such as media directors and counselors; 1,654 middle school teachers, 81 middle school principals, and 86 others; and 6,634 secondary teachers, 315 secondary principals, and 428 others.

Included in this total are also 409 district-wide instructional personnel; 367 supervisors and directors; 29 others such as specialists, social workers, and psychologists; 40 district superintendents; 31 administrative assistants; and 141 interns. Davis and Salt Lake counties employed 51% of the total personnel and served 52% of the state's total student enrollment.

Since 1988 virtually all Utah teachers have been endorsed in the core subjects they teach and a growing number have expanded their fields of expertise through inservice training and demonstrated competency. In certain rural and remote locations, some teachers must still fill multiple subject assignments and authorizations are granted to those in the process of completing added endorsement requirements.

Special education teachers and school counselors are the most critically needed. Utah's expanding program of comprehensive guidance and the implementation of the Student Educational/Occupational Plan have increased workloads of counselors beyond their capacity in many secondary schools. The State Board of Education is encouraging teacher education institutions to produce more counselors.

Utah's certification system continues to respond to changes brought about by school reform. With the

AVERAGE TEACHER SALARIES
(Excluding Career Ladders)

	1988-89	1989-90	1990-91
Regular Classroom Teachers	$22,852	$23,854	$25,614
Principals	37,509	39,137	41,910
All Instructional Staff	23,677	24,591	26,383
Supervision & Administration	37,576	37,974	40,852

middle level credential now eliminated, there are two flexible overlapping categories: elementary (1-8) and secondary (6-12). An added endorsement is required of elementary teachers at the 7-8 grade level, and kindergarten teachers must hold the early childhood endorsement.

Professional Practices Advisory Commission

In 1990-91 the Utah Professional Practices Advisory Commission (UPPAC) continued to review state standards of competence and ethics, facilitate peer reviews of teachers and administrators, conducted hearings into allegations of unprofessional conduct, and make subsequent recommendations regarding the certification of Utah's educators. During the past year, UPPAC acted to resolve 28 cases of unprofessional or immoral conduct including seven revocations, nine suspensions, one reprimand, two refusals to renew, three reinstatements, and six withdrawals, dismissals, or no action cases.

Utah Principals Academy

During 1990-91 the Utah Principals Academy facilitated the transition from school manager to instructional leader for each of the 28 participating Academy Fellows. Use of the State Office of Education's EDNET teleconference network made it possible to share presentations on proactive assessment, integrated learning and reading, and a teacher advisory program with principals and teacher groups throughout the state.

Now in its eighth year, the Academy continues to be a positive force for school improvement, innovative ideas, collegial networking, professional development, community/school collaboration, and the dissemination of training to other school administrators. 1990-91 was the first year the Academy sponsored a summer institute for principals and assistant principals at Utah State University.

UTAH'S PRINCIPALS ACADEMY

	1986	1987	1988	1989	1990	TOTALS
Number of Academy Fellows	42	44	42	36	28	**192**
Workshops/Seminars Involving Academy	30	27	26	31	25	**139**

We're increasing the high school graduation rate...

Alternative High Schools

A growing number of Utah school districts are establishing alternative high schools for both teenagers and young adults whose education has been interrupted for a variety of reasons. These people may include unwed mothers, individuals on probation through the courts whose parole officers have insisted they earn high school diplomas, or persons who can no longer attend high school full time because they must work to help support their families.

Alternative high schools offer flexible scheduling to meet the needs of students with part-time jobs, career counseling and on-the-job training programs that lead to full-time employment, and one-on-one attention that strengthens self-esteem and encourages a drug-free lifestyle and the development of individual talents and interests. Alternative high schools also often become centers for parenting education, community education, and learning English as a second language.

UTAH HIGH SCHOOL GRADUATES

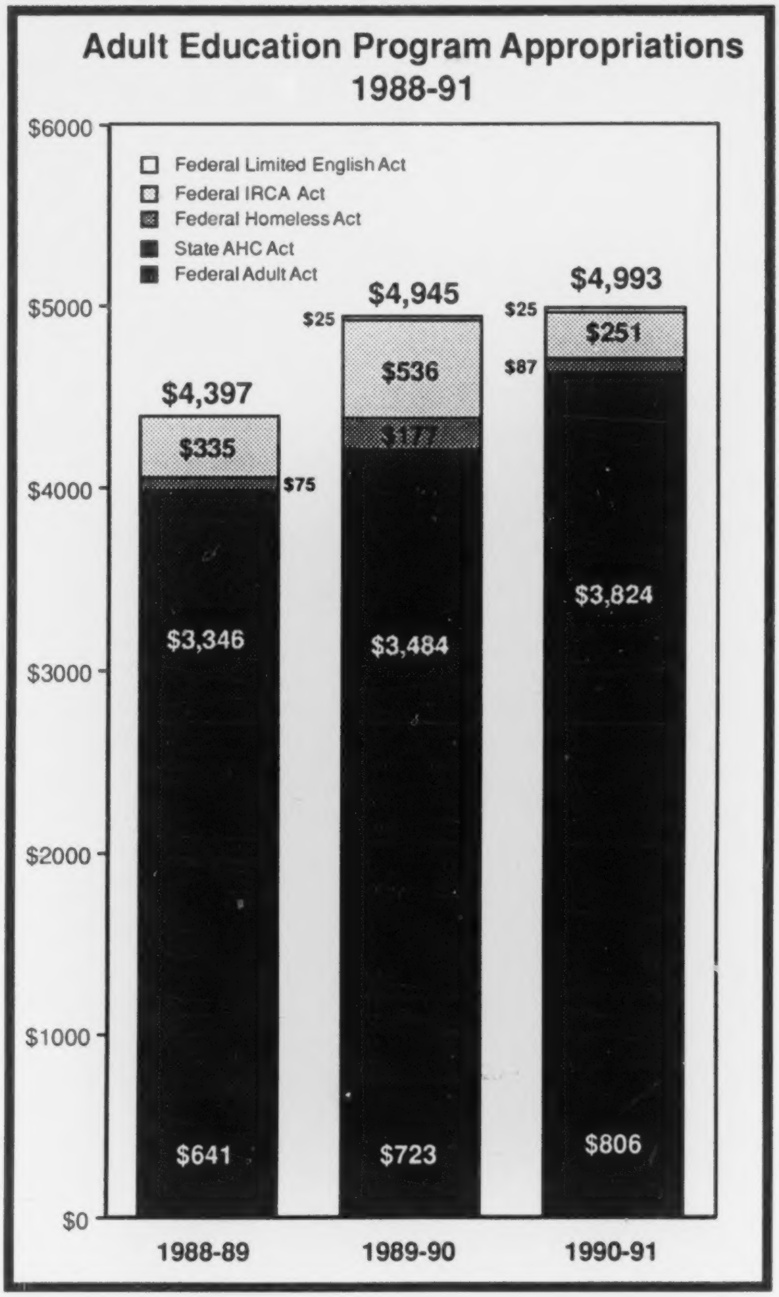
*Estimates of the cumulative effect of students dropping out over several years

Adult Education Programs

During 1990-91 24,028 individuals attended Adult Basic and Adult High School Education classes. Specifically, 62,788 individuals were enrolled in Basic Education (level 0-8); 17,240 took GED and Adult High School classes (level 9-12); 42,548 high school credits were earned in Adult Basic and Adult High School classes; 2,160 adults received high school diplomas; 4,724 took the GED Test; 3,226 met GED Test requirements; 2,793 participants obtained jobs; and 732 adult enrollees were removed from public assistance.

Adult Education programs enable growing numbers of Utahns to become literate, self-reliant, and contributing citizens. The State Office of Education Adult Education specialist works closely with Project Read and other regional programs as well as with the Utah Literacy Coalition which enable hundreds of citizens to attain literacy and lead more satisfying and productive lives.



GED Testing Program

The GED (General Educational Development) Test enables persons who have not graduated from high school to demonstrate knowledge and competence normally acquired through mastery of a core high school program of studies. Any individual 18 years of age whose class has graduated may apply to take the GED Test at any of the Utah State Office of Education's 21 contracted GED testing centers, and the Utah State Board of Education may issue a certificate to all successful applicants.

An individual's GED test scores are reported by national percentile rank based on GED Test norming scores set by regular graduating high school seniors. The GED Testing Program is self-supported by a testing fee of $25 and a certificate fee of $3. The number of GED Test applicants has risen from 801 in 1966 to 4,724 in calendar year 1990 with 73.2% planning further study.

Chapter I Supplemental Program

Student participation in Utah's Chapter I Program increased from 29,418 in 89-90 to 30,515 in 90-91. Chapter I supplementary instructional services are operating in all 40 school districts at 275 schools. In 1990-91 Chapter I served 16,885 males and 13,628 females. They included 1,868 American Indians, 1,005 Asians and Pacific Islanders, 498 blacks, 1,360 Hispanics, and 23,882 whites.

Chapter I services are closely coordinated with instruction in the regular classroom. The primary focus is on reading followed by mathematics and language arts. Sixty-one schools were involved in Chapter I School Program Improvement activities during the year that help empower all students to experience successful academic progress.

Turning Point Programs

During 1990-91 a total of 2,629 single parents, displaced homemakers, and/or single pregnant women were served by State Office of Education Turning Point programs funded with federal Carl Perkins dollars designated for persons in these categories and with Utah Displaced Homemaker funds. Utilizing the five ATCs and six community colleges in Utah's nine regional areas for service delivery has resulted in better coordination among agencies serving single parents, displaced homemakers, and single pregnant women who are separated, divorced, deserted, widowed, or whose spouse is disabled or for other reasons is unable to provide adequate support.

Single parents and displaced homemakers with the greatest financial need have received service during 1990-91.

Income when calculated with the number of dependent children shows that 26% of single parents and 42% of displaced homemakers have three or more children and that the majority of clients served in these programs are below poverty level in income. Turning Point center personnel provide pre-employment seminars; training, counseling, and guidance; and support services such as child care, transportation, and financial aid. Turning Point achieves a 75% placement rate for its clients in either an educational program or employment.

We're forming good citizens in drug-free schools...

Adult Roles and Responsibilities

A new Home Economics Family Life curriculum being implemented in Utah high schools this year, Adult Roles and Responsibilities, focuses on values, goals, decision-making, successful relationships, communication, parenting skills, and balancing the dual role of wage earner and family member.

Recent increases in social problems such as financial difficulties, child abuse, spouse abuse, single parent families, teenage pregnancy, and drug abuse suggest that parenting and family living skills are not being taught or applied in the home today as they were in the past.

The Adult Roles and Responsibilities program is preventative rather than curative in nature. It teaches students who will be the family members, workers, and citizens of tomorrow the strong life management practices they will need in their adult lives. The skills taught in these Home Economics classes are the ones all of us use on an everyday basis throughout our lives.

Character Education

During 1990-91 a Character Education Consortium was formed by the State Office of Education with eight school districts and 13 schools to explore the concept of character education and its implementation. Research on character education programs was conducted and the results used to identify character education thrusts. Development and training in various aspects of character education such as ethics and values was encouraged in individual schools and districts to begin to provide statewide program models.

Law-Related Education

Programs and services in Law-Related Education continued to grow during 1990-91. The Statewide Mock Trial Competition increased in scope from 72 to 79 schools representing 18 districts and four private schools. Volunteer attorneys served as coaches, and judges included both practicing lawyers and citizens from the community-at-large. The Mock Trial Competition is being modified to include elementary and middle schools and teaches students of all ages to use their minds well.

Conflict Management, an elementary program in conflict and dispute resolution, grew to include more than 50 schools in 12 districts and private schools and has made a noticeable impact on the peaceful atmosphere on school playgrounds and in school buildings. The Law-Related Education Project has received 501-C-3 status establishing it as a private non-profit organization.

The Drugs in the School Program continued to expand into all schools and grade levels, and training was provided in a number of Youth in Custody settings and to Detention and Youth Correction facility personnel. These programs are provided by the State Office of Education in cooperation with the Center for Civic Education, the Constitutional Rights Foundation, and the National Institute for Citizen Education in the Law.

Teacher training in *Using Literature to Teach About the Constitution and Bill of Rights* was well attended. Focus was also given to the Bill of Rights and Constitutional Bicentennial in the form of teacher training, curriculum development, and a Law Day celebration in cooperation with the Utah State Bar and the Utah State Attorney General's Office.

PK-12 Alcohol & Drug Prevention

From 1989 to 1991, Utah's PK-12 Alcohol, Tobacco, and Drug Prevention curriculum underwent significant updating and enhancing. Two grade levels (pre-kindergarten and kindergarten) have been added and are being utilized not only by elementary schools but also by some child care centers in targeted Utah communities. Revisions are completed through grade six, and the plan is to have the secondary level (which includes curriculum in healthy lifestyles, social studies, language arts, math, science, the arts, and vocational education) in the schools by May 1992.

In January 1990 the first training-of-trainers session in two years was held for approximately 200 persons consisting of teams of drug-free school coordinators, substance abuse prevention specialists, health educators, and teachers representing each of 13 local substance abuse districts. About 300 teachers and prevention specialists were also trained at the summer Healthy Lifestyles camp in Park City.

Drug-Free Schools Programs

The 40 school districts submitted 1990-91 plans for their portions of the Drug-Free Schools and Communities monies and each district program coordinator was contacted. The State Office of Education recommended six schools to the U.S. Department of Education for recognition of their efforts toward becoming drug-free school communities. Five schools received site visits and three (Rose Park Elementary and Highland High in Salt Lake District, and Pleasant Grove High in Alpine District) were among only 50 throughout the country to receive national recognition in Washington D.C. in June 1991.

Drug-Free School Regulations

In October 1991 all schools were required to be in compliance with the Drug-Free Schools and Campuses Regulations. All 40 school districts in Utah now have programs and policies for both students and employees. The student component includes age-appropriate curriculum, standards of conduct and disciplinary sanctions, information about available counseling, rehabilitation, and re-entry programs, and the requirement that both parents and students be given a copy of the standards of conduct with notification that compliance is mandatory.

Other Drug-Free Programs

Work was begun with Drug-Free School Zones, a statute which has been in place for approximately three years but remained somewhat obscure. The State Office of Education brought in the former director of the National Coalition for Drug-Free School Zones to help facilitate the implementation of this program in partnership with the Salt Lake County Coalition (an Office of Substance Abuse Prevention "Community Partnership" Grantee), the Utah Federation for Drug-Free Youth, Salt Lake City Police Department, and the Utah PTA. Four Salt Lake County schools already have posted signs launching the awareness phase of the program.

We're expanding the use of educational technology...

Educational Technology Initiative

In 1990 the Utah Legislature approved funding for the statewide Educational Technology Initiative (ETI) to provide greater access to technology in the state's public schools and colleges of education. The legislative goal was to assist in raising student mastery in math, reading, and language arts. To make the Initiative a community-wide effort, matching funds were part of the initial legislation. ETI has been a dynamic catalyst for equal access to technology for rural and urban districts.

At the same time, ETI is empowering districts of all sizes from Daggett and Rich to Granite to build technology systems to fit their unique needs with components such as CD-ROM and Hypercard, interactive videodisc players, and large-screen monitors. A growing number of community businesses are collaborating with schools in their localities to support the purchase of computers and other audio-visual equipment.

Results from the Initiative already indicate that teacher confidence in equipment is rising, equipment set-up time is being saved, student learning experiences are becoming richer and more diverse, infor-

EDUCATIONAL TECHNOLOGY INITIATIVE
Matching Funds Report
1990-91

Legislative Allocation	**$15,000,000**
Vendor Discounts	$13,795,017
Inservice Training, Grants & Contribution	5,085,579
Private Contribution	3,279,637
District/College Matching Funds	15,155,408
TOTAL MATCHING FUNDS	**$37,315,641**

mation presented has more immediacy, access to teaching materials is better, teachers have more one-on-one time with students, test scores in math and reading have risen, and districts are recycling older computer equipment more cost-effectively.

District Computer Services

Computer services currently being provided to all 40 school districts as well as to applied technology centers include: student services such as grade reporting, transcripts, evaluation, scheduling, attendance and membership accounting systems, and fiscal services such as payroll, budget, general ledger, and warehousing. These services originate through a telecommunication network that attaches 229 local school sites to a mainframe computer at the State Capitol. Currently, 2,630 persons have log-on security to access various systems that originate from the Utah State Office of Education.

The past year has seen tremendous growth in use of the OASIS attendance system and the scoring of criterion-referenced tests (CRTs) and norm-referenced tests (NRTs). OASIS attendance is now operating in 27 schools and is highly successful because of its interaction with the Student Information System (SIS) while allowing computing to be done on machines within the schools.

During the spring of 1991, the volume of CRTs scored at the State Office escalated to 497,330; the fall of this year found approximately 100,000 NRTs being scored in support of the Statewide Testing Program instituted by the Legislature along with an additional 88,000 off-level NRTs given as a result of elective district test programs.

State Office of Education personnel are currently involved in a dropout study project in which large districts with their own mainframes are providing student data that will interact with the SIS student data base to track students through all 40 districts. The project goal is to arrive at an accurate dropout rate. Associated with this project is an agreement by all districts to electronically exchange transcript/cumulative folder records on transferring students.

Under State Office leadership, a statewide task force was established to evaluate the best scenarios for educational data processing throughout the state. Represented on the task force were Granite, Davis, Ogden, Box Elder, Morgan, Jordan, Nebo, Juab, South Sanpete, Sevier, and Park City districts; fiscal analysts from the Legislature and Governor's Office; the state director of finance; and State Office personnel.

The State Board of Education approved final recommendations allowing individual districts to do their own data processing as long as they meet state reporting requirements; funding district data processing personnel costs as a line item in the budget; and the billing of processing and print costs to individual districts and customers.

Technology Instruction Projects

Twenty technology instruction projects were funded for 1990-91 through Project Assistance Services. Among them were: an electronic reference library in Cache; laser disc projects in Davis; writing and reading-oriented projects in Grand and South Sanpete; a satellite receiving station in Jordan; and hypercard math and science projects in Morgan and Logan. Several distance learning experiments and technology planning efforts are happening in the Northern Utah Education Service (NUES) region and Juab is doing teacher inservice.

Technology Curriculum Update

As part of the ongoing process of curriculum review and refinement, the technology core was revised and distributed to every school in the state in 1990-91. In addition, inservice classes using the EDNET system were held and reached 388 teachers, while the State Office of Education electronic bulletin board system (BBS) was expanded to become a complete technology resource for information, E-mail, and software acquisition.

Distance Learning Development

The Utah Distance Learning Development Alliance, formed a year ago by State Office of Education staff as a function of the Distance Learning Master Plan, is now well established in public and higher education as a resource to provide leadership and coordination in the development of distance learning activities crossing all grade levels.

Additionally, staff of the State Office has provided logistical and funding support to eight district/regional distance learning projects in public education now providing technological learning opportunities to under-served students in approximately 15 school districts. Distance learning continues to foster equal access to program quality and diversity and to be an increasingly cost-effective and flexible educational resource.

The EDNET Microwave System

Since 1987 State Office of Education use of the EDNET microwave network has expanded more than 300%, nearly as much as the EDNET system itself. Now providing fully interactive television connections to over 20 communities in Utah, EDNET permits the staff of the State Office to conduct agency meetings, conferences, workshops, and classes from a television studio located in the USOE basement.

With an average of 13 such meetings monthly during the past school year, the State Office now offers all 40 districts the convenience of conducting selected activities without the need to drive to centralized locations. It is clear that use of this particular technology can save in excess of 69% of the expenses normally associated with the delivery of many services provided by the State Office of Education on an ongoing basis.

Although the bulk of State Office EDNET use still consists of administrative meetings and conferences, the potential of EDNET for faculty and/or classified staff development at the school or district level and for direct classroom instruction is vast. The Uintah Basin Applied Technology Center in Roosevelt is setting a precedent in its aggressive use of EDNET for instructional purposes.

We're promoting K-12 core curriculum excellence...

Core Curriculum Update

During 1990-91 the K-12 Core Curriculum Program of Studies in mathematics, science, technology and all other subjects underwent refinement and responded to newly identified needs, fine-tuning itself to conform to the ever-changing nature of today's society. Its flexibility is an inherent asset as we witness the astounding historical events taking place in the world we live in.

Elementary Language Arts/Reading

At the elementary level, Language Arts accomplishments centered around the revision of the core K-6 with particular emphasis on writing process as it is embedded in the core. In addition, 16 workshops were conducted on language arts and test-taking to impact SAT scores, and 12 workshops were held for local schools, universities, and professional groups on children's literature and reading skills. Copies of the revised core were distributed to every elementary teacher and princi-

College/University Educators Served	**300**

pal including 2,000 sets of resource materials such as teaching strategy handouts and book lists.

Professional involvement included participation on agency committees such as the Language Arts Curriculum Committee, Attention Deficit Disorder/Special Education Committee, Special Education Master Plan Committee, Experimental/Developmental Budget Review Team, and the Alpine District Reading Committee. In addition, support was given to state and regional conferences with minimal financial aid and participation in literacy volunteer training as part of the 1,000 Points of Light on Literacy sponsored by the Utah Association of Women.

Secondary Language Arts

The refining and distribution of the revised secondary language arts core to language arts teachers throughout the secondary schools was a major project involving hundreds of language arts teachers from all across the state in EDNET conferences and in smaller groups. The impact of the Nine-District Consortium on language arts instruction in restructured schools was also a concern as was the infusion of applied communication skills to workplace settings.

Inservice involved over 1,200 teachers at five sites in rural Utah and at the Rural Schools Conference. The Integrated Language Arts Conference, which has been held for three years at Cottonwood High School in Salt Lake, provides inservice to over 400 teachers each August. Statewide networking efforts have resulted in productive meetings of Wasatch Front curriculum specialists in language arts and representatives to the State Language Arts Council.

Visual Arts/Music/Dance/Drama

The first summer workshop for secondary art teachers, tied to the Shakespearean Festival in Cedar City, was so successful it will become an annual affair. Two week-long arts education workshops during June 1991, trained 300 teachers in the elementary curriculum in dance, drama, music, and the visual arts. Twenty districts and 117 schools are now involved in the Arts Education Model Sites Project and the Foundations One part of the visual arts core is in the first draft stage of revision.

Together with KUER public radio, the State Office of Education completed and distributed a study guide for Soundwaves, a weekly 20-minute radio program designed to introduce students to classical music in the K-6 core. The guide includes vocabulary, information about the music and composers, and suggestions for follow-up activities relating to core objectives for use by elementary classroom teachers. Elementary music end-of-unit tests developed in 1990-91 are being piloted in selected schools this year. This year, 12 districts are implementing the state arts core with the help of a State Office of Education grant totaling $128,000.

Social Studies

Besides participation in the Nine-District Consortium and regular visits to assess core implementation, social studies activities included participation of 60 high school student body officers in Senate Youth, 750 students in Model United Nations, 10,000 students in the Citizen Bee, 20,000 students in the History Fair, 150 students in Utah State CloseUp, and 600 students in National CloseUp. Inservice workshops were held on teaching about religion in the schools.

Foreign Language

The 1990-91 foreign language survey reflected a slight gain in the percentage of secondary students studying foreign languages. During the 89-90 academic year, 31% of Utah's secondary students were enrolled in Spanish, French, German, Russian, and Japanese. Last year, the percentage was 32.3%.

For the first time, six of the seven schools offering Japanese are using the same curriculum, the video series *Let's Learn Japanese*, which is supported by materials developed by Nicholas Pond, Murray High School, and David McKee, Payson High School. The first Russian teachers trained under a State Office productivity grant began teaching in the Nebo, Provo, and Alpine school districts. In 90-91, 447 students in Utah were enrolled in Japanese and 338 students were learning Russian.

Library Media

Highlights in library media education for the year 90-91 included approval of the Library Media Five-Year Strategic Plan and the Library Media Core Curriculum K-12; inservice on core implementation; development of a statewide CD ROM disc to be used for retrospective conversion; the 2nd Annual State Read-A-Thon co-sponsored by Deseret Book, KSL, and the State Office of Education which provided $60,000 for school library programs; and a $500,000 legislative appropriation to implement accreditation standards for library media collections.

Inservice sessions conveyed the message that library media education is fundamental to the successful and essential restructuring of the learning process in the schools. Textbook, workbooks, lectures, and other elements that facilitate teaching and learning must actively involve students in information searching and problem solving to help them acquire the skills they will need for life in the 21st century. School library media programs must be a priority to accomplish this goal.

Healthy Lifestyles

A motion picture is being developed to provide a consistent, timely, and efficient way to address comprehensive health issues to support classroom instruction for children. Hundreds of Utah teachers attended a five-day 1991 wellness conference led by education and health leaders to learn new ways to teach health concepts appropriate to age and grade level needs.

The elementary video series *Kidsercise* continued to receive enthusiastic use throughout the state supported of both teachers and students, and was promoted during a 1991 visit to Utah by Arnold Schwarzenegger, chairman of President Bush's Council on Physical Fitness and Sports. Teachers are being updated on new information concerning HIV education that will be provided for thousands of students, and the first phase of the K-12 human sexuality program has been developed.

Gifted and Talented

Last year, two-day statewide training sessions in gifted and talented pedagogy were held between July and November in three regions of the state. Approximately 100 teachers on beginning and intermediate training levels attended and are expected to return to their districts and develop programs for gifted and talented students that conform to their local needs and utilize the unique creativity and local assets in their communities.

School Accreditation

During 1990-91, 163 schools including 99 high schools, five middle level schools, 19 elementary schools, three K-12 schools, and 37 special purpose schools were accredited by the Northwest Association of Schools and Colleges. In addition, the State Board of Education accredited 90 elementary schools and 77 middle level schools. All of them completed and submitted a report to the Board and State Office of Education accreditation specialist indicating how well they are meeting specific categorical standards.

In addition to information on standards, the reports include data on graduation requirements, implementation of the core, teacher and student attendance figures, testing programs, drop-out rates, student education plans, class periods per day, counseling, and compliance with state laws. In 90-91, 18 full team evaluations were completed: four elementary schools, two middle level schools, seven high schools, and five special purpose schools. Thirty-five follow-up visits were also made.

International Education

A significant increase in interest and participation in international education programs and activities motivated the State Office of Education to sponsor a number of workshops and institutes in 1990-91 involving about 300 teachers. Resulting district workshops have involved several thousand teachers and could make a potential impact on 85% of Utah students.

The State Office of Education's International Education Resource Center is being used extensively by teachers. Teaching units, resource material, artifacts, filmstrips, videos, and prints are in constant demand. A number of districts have initiated their own international centers to make such resources more accessible.

A strong collaborative network in international education has developed among the State Office of Education, district offices, individual teachers, universities, community organizations, private groups, student exchange programs, and other entities. A college-level organization for international students and closer cooperation between district personnel are among the results. A state international education committee has also been recently formed.

We're serving disadvantaged and special ed students...

At Risk Programs

All At Risk funds are intended for use consistent with the 1988 Master Plan for Services for Students At Risk that recommends a service system based on interagency collaboration and maximum involvement of the family and business community. The years of 1990-91 saw At Risk flow-through funds distributed to districts for programs based on their individual needs.

Funds were appropriated to Values-Based Teenage Pregnancy Prevention Programs and into the interagency pool of resources for the Early Intervention for School Success. Seven elementary school communities supported school-based interagency models in 90-91.

Special Education

In May 1991 the Utah Agenda for Meeting the Needs of Students with Disabilities was developed in a two-day retreat. Participants included representatives from every group interested in public education as it relates to students with disabilities and set ten strategies in motion which were completed in December 1991. In addition, Congress passed PL101-476, the Individuals with Disabilities Act, and amendments to the federal special education law which will have a profound impact on services delivered to students with disabilities.

Number of Students Served in **SPECIAL EDUCATION** by HANDICAPPING CONDITION (Ages 3-21) 1990–91

Intellectually Handicapped/ Severely Intell. Handicapped	3,145

Preschool Noncategorical (Ages 3-5)	3,424
TOTAL (Ages 3-21)	**46,602**

Special Transition Programs

In 1990-91 the Utah State Office of Education received an additional $84,000 plus local resources for the transition of students into Vocational Education, Work-Based Training, and Competitive Employment. This year the Governor's Committee on Employment of People With Disabilities awarded the Golden Key to City Market and Carbon School District for their collaborative transition program.

Salt Lake, Provo, Davis, Box Elder, Ogden, and Weber districts used their funds to develop pilot transition programs for students with disabilities. As a result, Utah received one of 12 five-year grants involving nearly $2.2 million from the U.S. Department of Education to implement The Systematic Transition of Utah's Disabled Youth (STUDY). This grant is to develop a statewide systems program for rural, urban, and metropolitan areas. Salt Lake Community College received a five-year grant to continue an IBM computer program for transitioning severely disabled students traditionally served in sheltered workshops into apprenticeship positions and competitive employment.

Carl Perkins Vocational

The State Office Services for At Risk Students (SARS) Section provided technical assistance in 90-91 to all 40 school districts and nine post-secondary institutions. The Ogden-Weber Applied Technology Center, along with Ogden and Weber school districts, became a center to train disabled students and non-handicapped students together in a mainstream vocational program. Ogden-Weber ATC revamped its programs to allow for needed Special Education resources and student aides. One special ed student won second place in a statewide VICA competition.

Disadvantaged and Limited English

Successful programs for academically and economically disadvantaged students are being integrated into the regular vocational budget and refined or modified in preparation for Carl Perkins II legislation. Efforts to blend a well-rounded academic-vocational curriculum that is responsive to the particular needs of disadvantaged youth are already in progress. Construction of portable classrooms for local school districts and vocational technical computer training has received strong support from the prison administration.

Apprenticeship Programs

In 1990-91 the SARS Section administered related training programs serving apprentices, provided inservice training for apprenticeship instructors and coordinators, implemented two Memorandums of Agreement. One makes credit and curriculum transferable between seven institutions offering related training, and the other Memorandum protects 16-year-old disabled apprentices under Workman's Compensation just as if they were regular apprentices.

The Section also co-chaired the Apprenticeship Internship Steering Committee with the Board of Regents, Job Service, and the Bureau of Apprenticeship and Training, and implemented the School To Apprenticeship (STA) program for 16-year-olds in high school. Fifty STA students are enrolled and the program has been endorsed by the Industrial Commission, Union and non-Union Coordinators, and trainers from business and industry.

Stewart B. McKinney Homeless Assistance

As required by the McKinney Act, the Section has gathered data on the numbers, locations, and accessibility to shelters and schools for homeless children and youth in Utah and revised the Utah State Master Plan addressing the needs of homeless students. A statewide Call to Action on Behalf of Homeless Children in Utah conference was held and three demonstration projects have been implemented in Salt Lake and Ogden districts and the Lowell Bennion Center at the University of Utah.

Some of the main focuses of the newly formed State Advisory Committee for the Education of Homeless Children and Youth have been school meals, programs for homeless children, school fees issues, preschool and Head Start accessibility, and community and local school awareness of the needs of homeless children. The SARS Section served as a member of the State Ad Hoc Advisory Committee and was able to coordinate with the Department of Community and Economic Development to draft Utah's 1991 Homeless Count.

The SARS Section has also monitored and coordinated with local school districts to ensure compliance with legal procedures to enroll homeless students. In conjunction with the Salt Lake Community College/Skills Center, the Section has facilitated the involvement of homeless teen parents in vocational skill training and developed a systematic way to maintain the confidentiality of school and shelter location of parents and children who transfer among Utah school districts and from other states.

Corrections Education Program

The Corrections Education Recidivism Reduction program provides a collaborative service to inmates and agencies to reduce the rate of return of Utah inmates to prison. The Utah State Board of Education, which is responsible for the education of all persons in the custody of the Utah Department of Corrections, contracts with local education agencies for services.

Major funding in FY 91 was from a restricted Utah State Office of Education line item budget of $389,200 with supplemental services from any source identified as appropriate for the inmates. In 90-91, 3,037 inmates at 19 sites (3 prisons, 10 jails, and 6 community centers) needed educational services from these restricted funds amounting to $128 per inmate. An estimated 65% of Utah inmates ultimately return to crime and to prison.

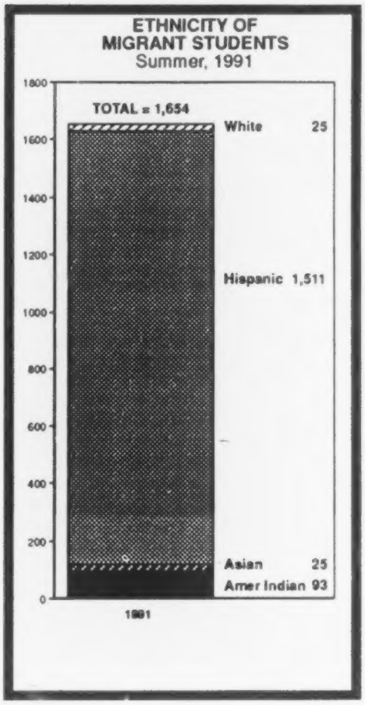
Youth In Custody Program

Utah's Youth In Custody Program provides identified educational instruction and support services to all children and youth in the custody of the Division of Family Services and Division of Youth Corrections. The Utah State Board of Education contracts with school districts to provide locally initiated services through state restricted Youth in Custody uniform school funds and supplemental services from appropriate sources such as Special Education, Chapter 1, Carl Perkins, and GED Testing. Services provided by local school districts are reviewed by a local Youth In Custody Advisory Council composed of educators and service agency staff.

Migrant Education Program

Utah's Migrant Education Program has seen an increase in enrollment over the past three years. During summer, 1991, the program identified and recruited over 1,600 students age three through 21. A recent major thrust has been to raise the awareness of migrant parents and families of the importance of a good education to their children and their future and how parents and family members can reinforce classroom lessons at home to help migrant children master basic skills. Hispanics remain the single largest migrant ethnic group.

A concerted effort is also underway to coordinate more closely with other federal and state programs. A Letter of Agreement between the Ogden/Morgan Private Industry Council (JTPA) is in the process of being developed to identify students that can be jointly served. The Migrant Program is working closely with the Institute of Human Resource Development (Migrant Head Start) on behalf of children age three and four and cooperating with the Utah Family Health Department to provide health clinics at five sites.



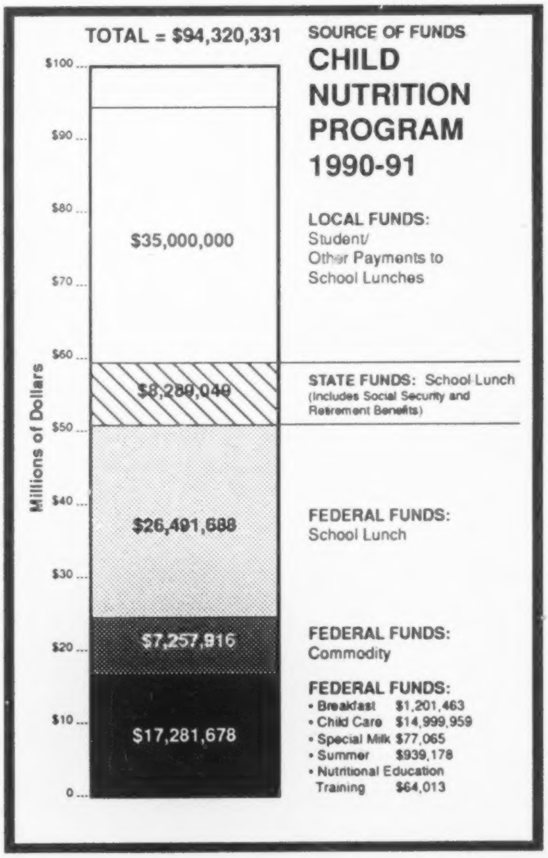
We're providing education support services...

Child Nutrition Programs

During 1990-91 the Child Nutrition Programs (CNP) continued to administer School Lunch and other food service programs in accord with regulations promulgated by the U.S. Department of Agriculture to public and private schools, institutions and summer camps. The staff provided leadership and technical assistance and acted as liaison between the federal government and locally administered nutrition programs.

These programs include the National School Lunch Program, School Breakfast Program, Child and Adult Care Food Program, Summer Food Service Program, Special Milk Program, Food Distribution Program (Commodities), and the Nutrition Education and Training Program. A full-time training specialist was recently added to the CNP unit to better assist local programs as nutrition programs become more vitally needed than ever before.

A strategic planning committee is implementing goals established during the previous year. The goals focus on technology, marketing, educational involvement, economic support and training. Ways to



increase student participation and fiscally sound programs are being emphasized. School lunch program coordinators are working to provide low-fat meals which suit today's health-and fitness-conscious lifestyle and help young people to establish lifelong habits of good nutrition.

Emergency Preparedness

In 1991 the State Office of Education Emergency Preparedness Disaster Program was implemented in the state's 40 school districts in coordination with the State Division of Comprehensive Emergency Management and the Federal Emergency Management Agency. District and school personnel participated in a state education conference on emergency preparedness. The conference hosted 102 representatives from public and private schools, universities, community colleges, ATCs, along with county and state governments.

State Office Research Library

The Research Library at the Utah State Office of Education continues to respond to several hundred inquiries each year from state and local education personnel and members of the public interested in current educational policy and practice. Library services include consulting on research strategies, performing database searches, preparing bibliographies, writing literature reviews, developing a collection of reference works, cataloging agency publications, codifying information policies, and assisting in agency records management.

School Law and Legislation

During the past year, the State Office of Education's School Law/State and Federal Legislation Section was involved in writing and submitting two Friend of the Court briefs to the U.S. Supreme Court to hear the graduation prayer issue. Because of this effort, along with many others, the U.S. Supreme Court heard the Lee vs. Weisman case in November 1991, which has yet to be decided. The resolution of this case has the potential to save several school districts and perhaps the state substantial costs in legal fees.

The Section coordinator wrote and worked to pass into law the authorization of criminal background checks to include fingerprinting prior to a person becoming certified as a teacher by the State Board of Education. This law should help to significantly reduce the risk that persons who might endanger children will teach in the public schools.

Acting only in a "sounding board" capacity, the Section responded to hundreds of telephone and in-person inquiries from parents, teachers, district personnel, public officials, and the Utah Attorney General's Office. Also it responded to the general public on school prayer, choice of teaching materials, copyright regulations, access to school records, district citizenship policies, residency requirements, truancy issues, and sexual harassment.

The Section specialist acted as a hearing officer in numerous Child Nutrition Program audit appeals and worked closely with the Attorney General's Office to suggest changes to and prepare the Utah State Office of Education to implement the new Government Records and Management Act. Both the coordinator and specialist served as State Land Board members as designees of the State Superintendent of Public Instruction. The State Land Board makes various decisions affecting revenue to Utah schools.

Human Resource Management

During 1990-91 the State Office of Education Human Resource Section handled 105 recruitments representing a 19% turnover and a 64% increase over the previous year and 52 position classifications. Eighteen training sessions were held for 390 employees in sexual harassment prevention, drug-free workplace, new employee orientation, and corrective action/discipline.

Approximately 500 contacts were made with individual supervisors and managers. Assistance in co-dependency, psychological distress, and other problems was given to seven employees. In addition, training and policy development services were provided to certain school districts and ATCs. Human Resource Management Section efforts indirectly enhance quality schools and student success by assuring that the State Office of Education employs well qualified staff.

Public Relations/Media Production

During 1990-91 the Section coordinator maintained daily contact with representatives of the electronic & print media resulting in numerous segments on local television public forums as well as regularly aired live news coverage by Utah's network and public television stations, radio broadcasts, and hundreds of newspaper feature articles. Such public relations efforts have a widespread impact on better understanding of statewide educational needs and accomplishments by civic, business, and community leaders and by the public at large.

The Public Relations staff continued to prepare and distribute the Annual Report of the State Superintendent and supplements, Utah School Directory, Media Notebook, Fingertip Facts, Board Briefs, education-related clippings from daily and weekly newspapers, the annual School District Calendar, drafted curriculum manuals, educational journal articles, and a series of telephone hotline messages for the Utah Center for Families in Education.

The Section also wrote, photographed, produced, and distributed three issues of StudentFOCUS, the official publication of the State Board of Education, to 23,000 teachers, administrators, legislators, local school board members, and others throughout the state and nation. In addition they complede Education Updates, news releases, special topic newsletters, brochures and flyers serving the State Office of Rehabilitation as well as the State Office of Education needs.

In order to better inform business leaders, legislators, media and the public on what is working in Utah schools, a new publication titled *A+ Success Stories in Utah Schools* was initiated. Each week, four to five "Success Stories" have been distributed to over 700 key communicators in Utah and the nation.

The Media Production Unit produced a 17-minute video on the Educational Technology Initiative, six videos ranging from five to 30 minutes each supporting the core curriculum, and nine 5-to-30-minute videos providing information about Utah's education system involving numerous on-site efforts and interviews. Such productions have a direct impact on successful student learning and on the implementation of legislative and Board-approved programs.

The Graphics Unit produced needed educational materials for all staff in the State Office of Education and the State Office of Rehabilitation. Such items as core curriculum materials, agency financial and accounting forms, brochures, annual reports, special recognition events, artwork and set design for educational films, curriculum workshops and programs, a Bicentennial Bill of Rights display and a new education display at the State Capitol were produced. Transparency presentations, newsletters, and other needed visual materials for agency staff use in their interaction with educators, the professional and business community, and the public sector were produced using computer desktop publishing and other traditional graphic methods.

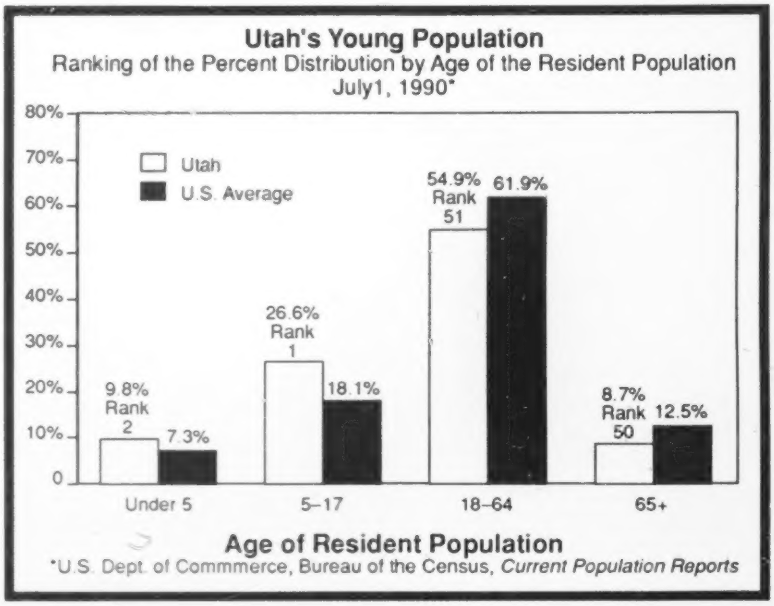
The Public Relations Section worked all year in close coordination with the Governor's Office in support of education-related press conferences and special events, and as a supplier of information and editorial writing service for the Governor's Awards for Educational Excellence and other programs. The Section is "on call" to facilitate contacts between the media and education spokespersons at State Board meetings, to troubleshoot controversial issues, draft speeches, tributes, and resolutions, and to provide public relations assistance to state staff and school districts.

We're being accountable for finance and statistics...

School Finance Update

In 1990-91 the School Finance and Statistics Section continued to provide funding and related services for the regular K-12 statewide public school system; to collect and report a wide variety of fiscal and non-fiscal data; to oversee the four overlapping 18-month public education budgeting cycles; to hold annual regional public hearings to gather statewide input on the State Board of Education's annual legislative request to the Governor; and to provide a variety of related technical assistance services to local school districts and other agencies.

During the year the Section responded to changes brought about by the comprehensive school finance study relating to district equity and and restructuring of school finance formulas and by the trend which began with Utah's block grant districts to encourage school districts to make a broadening array of their own fiscal choices. This practice promises to enhance ownership in and effectiveness of the education system while sustaining vital accountability at the state level.



Utah's Young Population

Ranking of the Percent Distribution by Age of the Resident Population July1, 1990*

Age of Resident Population

*U.S. Dept. of Commmerce, Bureau of the Census, *Current Population Reports*

The Demographic Challenge

Utah's demographics continue to reflect an atypical pattern unlike that of its neighboring states. Although our birthrate is decreasing, it remains the nation's highest, as does the percentage of our young school-age population of 5- to 17-year-olds. At the same time, Utah has a smaller percentage of tax-paying citizens of prime working age (18-64) than any other state to generate public dollars for public education.

CHANGES IN SCHOOL AGE POPULATION AND CURRENT EXPENDITURES PER PUPIL
Utah Compared to National Averages

	FY1980	FY1989	% Change 1980-89	FY1990	% Change 1989-90
School Age Population (000)*

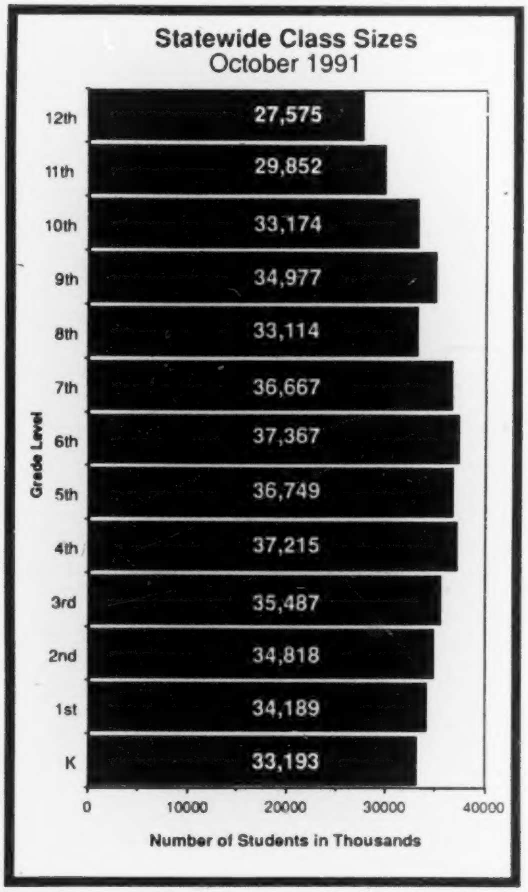
National Rating	47	51	NA	51	NA

* U.S. Dept. of Commerce, Bureau of the Census, Population Estimates, Unpublished Tabulations.
** Estimates, National Education Assn., Rankings of the States

Presently complicating this picture is an implied net in-migration of 19,000 persons from 1990 to 1991. This figure is determined by the remaining number from a reported population increase of 2.7% or 46,000 persons and subtracting a natural increase of 27,000 (total births minus total deaths). This is the most population growth Utah has experienced in ten years and its biggest in-migration since 1983.



Utah's New Enrollment "Bubble"

Our school system was not fully prepared for such a sharp consequent upswing in school enrollment just when the growth surge of the mid-80s was leveling off. The statewide enrollment "bubble" now centered on the 6th grade containing 37,367 students is predicted to exceed 38,000 in the 9th, 10th, and 11th grades in 1995-1996, when overall enrollment is again expected to decline.

Public Education ENROLLMENT PROJECTIONS*
1992-93 through 1996-97

SCHOOL YEAR	FALL ENROLLMENTS	INCREASE OVER PREVIOUS YEAR	
1992-93	461,500	7,282	1.60%
1993-94	465,593	4,093	0.89%
1994-95	466,899	1,306	0.28%
1995-96	466,576	(323)	-0.07%
1996-97	467,638	1,062	0.23%

* Based on the latest year of experience.

NOTE: Unexpected changes in migration patterns could substantially alter estimates of student enrollments.

Source: State Office of Education, School Finance & Statistics

At the same time that Utah's average school enrollment per district was rising last year, the number of districts productively remained the same, conserving administrative costs. In fact, 1990-91 saw four fewer public schools than in the previous year as well as a 1.7% increase in student teacher ratios. Utah's public education system remains caught between its spectacular potential and the twin constraints of its demographic realities and conservative funding ethic.

Internal Accounting

In 1990-91 the Internal Accounting Unit monitored the fiscal accountability of the State Office of Education, State Office of Rehabilitation, Child Nutrition Program, and the Minimum School Program, and served as the funding agent for the Applied Technology Centers and Fine Arts Programs, the Utah State Hospital, the Utah State Training School, and Corrections Education.

The Section provided financial information to the State Office of Planning and Budget, Legislative Fiscal Analyst, Department of Administrative Services, and all education-related legislative subcommittees, and worked closely with the newly appointed internal auditor of the State Board of Education, and provided information for the State Auditor for the completion of the required Federal Single Audit.

Internal Accounting also processed approximately 48,000 transactions during the year and was responsible for a budget of in excess of $1 billion containing 80 different revenue sources and for budget preparation and maintenance, payroll, purchasing, cash receipting, inventory, expenditure control, and the negotiation of the indirect cost rate.

Conclusion

Children are our future!

Every year the task of prioritizing our education needs seems to become more difficult as we strive to identify the most urgent need of all. We serve a public that demands even more and better results despite persistent under funding. We have a long-term obligation to continue to support the education of our children as they move through the school system, a system shared by those now migrating to our state in increasing numbers. Never before in history has it been so important for the executive and legislative branches of our government to work together.

Children are our future and education is the key to that future! If Utah regards its young people as a valuable resource, Utahns must make the sacrifices to prove it and put their own priorities in order. As we counted on the past generation to educate us, our children are counting on us to empower them to succeed. A good education remains the smartest, most responsible investment we as citizens, as consumers, and as parents can possibly make for us all.

(1) Includes current expenditures for administration through fixed charges.

(2) The sum of the expenditures previously listed in this chart.

(3) Restricted fund for transporting students due to hazardous conditions, interscholastic activities, night activities, and educational field trips approved by local boards of education, as per state law.

(4) Restricted fund for tort liability insurance, claims, reserves, etc.

(5) Includes limited special maintenance projects and equipment, textbooks, and supplies, as per state law.

* Daggett--A one-time expenditure for equipping a new building is included in this calculation from funds saved over a period of time. The current expenditure per pupil normally would have been $7,865.70 for Daggett and the state average per pupil would have been $2,803.83 for Fiscal Year 1990-91.
